Work Experience

Frontend Developer / Product Designer   2016.09 - Present
3YOURMIND GmbH, Berlin

Lead designer and developer for a new project called AM Part Identifier. Introduced Vue.js to the company and helped the main product team decided switch to Vue.js.

Worked closely with the Django backend team to implement new features. Refactored outdated Knockout.js code to increase a better performance and added new functionality to the old prince.

Product designer for main products, wrote the code foundation to ensure further implementation. At the same time, based on the new design, a new design system call Kotti is created which help the further development team to deliver consistent product.

Founder / Product Designer   2015.05 - 2016.07
Caidan Technology Co., Ltd., Hangzhou

Managed three projects on different platforms: iOS, Android and web client. Helped mobile app development and function implementation. Developed website front end and integrate the API from Java backend.

Web Developer Intern   2014.11 - 2015.04
SAP SE, Walldorf

Working student at SAP headquarters. Participated the implementation of new design support page.

Collaborated with SAP Spanish team to develop CRM software on SAP Hana using SAP home brewed Javascript library Open UI.
